

4. What Should You Buy?

Your Current and Future Needs:

Before you start searching for a home, you need to think about your needs both now and in the future. Here are some things to consider:

- **Size requirements.** Do you need several bedrooms, more than one bathroom, space for a home office, a two-car garage?
- **Special features.** Do you want air conditioning, storage or hobby space, a fireplace, a swimming pool? Do you have family members with special needs?
- **Lifestyles and stages.** Do you plan to have children? Do you have teenagers who will be moving away soon? Are you close to retirement?

Try to buy a home that meets most of your needs for the next 5 to 10 years, or find a home that can grow and change with your needs.

Choosing a Location That Is Right for You:

Even if the home you choose has everything you need, the location might not be appropriate. When deciding where to live, you should take the following things into consideration:

- Whether you want to live in a city, a town or even in an out-of-town location
- Where you work and how easy it is to commute
- Where your children will attend school and how they will get there
- Whether you need a safe walking area or recreational facilities such as a park nearby How close you would like to be to family and friends

New Home, Previously Owned or Build Your Own?

When thinking about the kind of home you want, the first thing you should consider is whether you want a previously owned home (often called a resale) or a new home.

Here are some characteristics that may help you decide:

New Home:

- Personalized choices. You may be able to upgrade or choose certain items such as siding, flooring, cabinets, plumbing and electrical fixtures.
- Up-to-date with the latest codes/standards. The latest building codes, electrical and energy-efficiency standards will be applied.
- Maintenance costs. Lower maintenance costs because everything is new and many items are covered by a warranty.
- Builder warranty. A homebuilder's warranty is usually available in all provinces (except Nunavut and the Northwest Territories). This can be important if a major system such as plumbing or heating breaks down. This warranty does not apply if you build the home yourself.
- Neighbourhood amenities like schools, shopping malls and other services may not be complete for years.
- Taxes such as the Goods and Services Tax (GST) (or, in certain provinces, the Harmonized Sales Tax (HST)) will apply. However, you may qualify for a rebate of part of the GST or HST on homes

4. What Should You Buy?

Row House or Townhouse:

One of several types of single-family homes joined by common walls. It offers less privacy than a single-family detached home but still provides a separate outdoor space. These homes can cost less to buy and maintain.

Link or Carriage Home:

Houses joined by garages or carports, which provide access to the front and back yards. Builders sometimes join basement walls so that link houses appear to be single-family homes on small lots. These houses can be less expensive than single-family detached homes.

Manufactured Home:

A factory-built single-family home that is transported to your chosen location and placed on a surface-mounted foundation. The term manufactured home has replaced the term "mobile home".

Modular Home:

Also a factory-built home constructed in compliance with local building codes. The home is typically shipped to your location in two or more sections. It may or may not have a longitudinal sub-frame.

Condominium:

Refers to a form of legal ownership as opposed to a style of construction. Condominiums can be high-rise residential buildings, townhouse complexes, individual houses and low-rise residential buildings. Condominiums are also known as stratas in British Columbia or syndicates of co-ownership in Quebec.
